KEYMACRO is the free text-to-speech voice recorder that lets you easily record any text message and read it aloud

later. It allows you to customize the sound of the voice, make audio notes and share them with others, record numerous messages, and play them back in any order you want. The text-to-speech voice recorder is a basic voice recorder. Microsoft has unveiled Office 2016, the next version of its productivity suite for Windows 8.1 and 7, and Windows 10 users will be able to download and use Office 2016 from day one. The new Office for Windows 8.1 and Windows 7 will be available for free for new users on Windows 8.1 and Windows 7, or for upgrade from Office 2013. Microsoft is offering Office 2016 for Windows 8.1 for \$129.99 and \$99.99 for Windows 7. For \$119.99 you can also upgrade an existing Office 365 subscription to Office 2016. Office 2016 includes new versions of Word, Excel, PowerPoint and OneNote. While not all of the features in Office 2016 have been released to the public, Microsoft is gradually rolling them out and we will have an article highlighting some of the features and information as we get it. Here is a list of the features in Office 2016: New Features in Excel: Flexible Worksheet Design: Flexible worksheet design is the ability to group rows, columns and free-format areas in a spreadsheet. New features include the ability to specify the size of the largest data value in the spreadsheet, display blank rows and blank columns, display decimal places of numbers, insert custom shapes, and display two-dimensional array formulas. Advanced Data Analysis: Advanced data analysis includes analysis of large data sets, filtering, transforming, and combining data sets. New features include PivotTables, Power Query, Power View, the ability to dynamically change filters, the ability to add fields to Power View reports, and grouping and sorting reports. Pivot Tables and Power View: In Excel, you can make a PivotTable quickly by dragging and dropping fields into a pivot table. This means that you can use a PivotTable to create a summary of information about an existing set of data or to create a PivotTable that dynamically displays new data. Power View combines information from multiple data sources, such as spreadsheets, databases, and online web services. Power View can be used in a wide range of business scenarios to help users see, explore, and analyze 2edc1e01e8
